

If you give good service and devote significant resources to guest satisfaction, it's time to make sure that your online reputation is real and fair. We offer two ways to guarantee this:

Have the **estey**si APP available at your hotel. A product that will get customers writing reviews or opinions about their stay whilst they're at your property and in the most convenient and efficient way possible.

It will motivate and encourage your guests from the moment they book right up to check out, so that the wealth of services you can offer them with 'esteysi', will unleash the instinctive need to share their experience with others.

For more information about how to buy the **estey**si APP contact us by sending an email to the following email address: [sales@esteysi.com](mailto:sales@esteysi.com).

Identify your Hotel with the stamp of its true "online reputation". Tourist accommodations bearing this stamp mirror the reliability and attention to detail represented by the website **estey**si.com.

Experience a powerful, affordable, modern, comprehensive and easy-to-use tool. No more need for your online reputation to be measured by parameters that you can't control. Now you will know and control these parameters, so that the measures fairly reflect the service and resources being offered by your business.
